Hello!

If you want to study the source code of dednat6 and learn how to add your own extensions, start by this.

Some tests (see the source!):

```
foo     poo        boo
```

FOO BOO 82: FOO 83: BOO

You will need to understand the sections 3 and 4 of the TUGBoat article: https://tug.org/TUGboat/tb39-3/tb123ochs-dednat.pdf
